THE JULIET ROSE

Class Chapters

Duration: 40 Minutes

Skill Level: Advanced

1. Piping practice: (start to 05:50)
2. Flower piping steps (05:58 to 23:01)
3. Removing from flower nail (23:11 to 23:30)
4. Repeat flower & steps (23:39 to 34:58)
5. Troubleshooting and removing from nail (35:04 to 37:02)
6. Adding Stamens (37:26 to 40)

Piping Outline

Steps

1. Make a large base with a Wilton 2A or 4B.
2. Make your buds with your Wilton 101 tuned. Make 2-4 buds. The more buds you make, the more advanced your flower will be.
3. Start wrapping your petals.*
4. Add transitional/ring/outer/lower petals with a GG Cakraft 1062/1061 and an Ateco 124K.
5. Add outer/lower petals mainly with your GG Cakraft 1062/1061 and Ateco 124k.
6. This step is optional, but if you would like to add a stamen, we do it here! This appears at the end of the video. You will need a small Wilton round tip and a snip-tip.

*Make sure to watch the pre-piping practice in the beginning of the video. Important factors like petal formations (like wrapping), wrist positioning and petal lengths are discussed and demonstrated.
